

SHYAM KAILASH

AI/ML ENGINEER | GENERATIVE AI DEVELOPER | FULL-STACK SOFTWARE ENGINEER

Coimbatore, Tamil Nadu, India | +91 8248229164 | shyamkailash268@gmail.com | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

AI/ML undergraduate engineer who builds full-stack Generative AI and Agentic AI applications using LLMs, RAG, and modern web frameworks. Skilled across the product lifecycle — from AI model integration to production-ready front-end and back-end systems in Python, FastAPI, Django, React, and Next.js. Proven track record leading technical teams and shipping working AI products. Seeking AI/ML Engineer or Software Engineer internship roles.

TECHNICAL SKILLS

Languages

Python, Java, C, SQL, JavaScript, TypeScript

AI / Machine Learning

Machine Learning, Deep Learning, NLP, Computer Vision, LLMs, RAG, Agentic AI, Prompt Engineering

Frameworks & Libraries

FastAPI, Django, React, Next.js, TensorFlow, PyTorch, OpenCV

Databases

SQLite, MySQL, ChromaDB

Tools & Platforms

Git, GitHub, VS Code, Ollama, Hugging Face, Google AI Studio

EDUCATION

B.Tech — Artificial Intelligence & Machine Learning

Sri Shakthi Institute of Engineering and Technology

Anna University

CGPA: 7.54

CERTIFICATIONS

- Google AI Agents — Intensive Vibe Coding
- Infosys Springboard — Generative AI & NLP
- Computer Vision 101
- Artificial Intelligence Fundamentals

CORE STRENGTHS

- Full-Stack AI Product Development
- Team Leadership & Collaboration
- Rapid Technology Adoption

KEY PROJECTS

LMSGuard — AI-Based Online Examination Monitoring System

- Engineered** a real-time AI proctoring platform with FastAPI, Next.js, and WebSockets for live monitoring and automated violation reporting.
- Led** the team through the full build, coordinating frontend, backend, and AI-model integration end to end.

GenRec-AI — Agentic AI Lab Record Generator

- Built** an agentic AI system in Django integrating RAG, ChromaDB, and LLMs to auto-generate structured laboratory records.
- Automated** a manual documentation process using prompt-engineering and vector-retrieval pipelines for accurate, context-aware output.

TASKORA — AI-Powered Task Management System

- Developed** an NLP-driven platform for intelligent task extraction, prioritization, and effort estimation from natural language input.
- Integrated** voice-assistant capabilities and ML-based auto-categorization to streamline task management.

INTELLIX — AI Knowledge Management Platform

- Architected** a semantic search platform using AI-powered embeddings for intelligent document indexing and retrieval.
- Built** meeting-intelligence features to extract and organize actionable insights from unstructured content.

LEADERSHIP & ACHIEVEMENTS

- Led** the LMSGuard project team, coordinating full-stack development and AI-model integration from concept to deployment.
- Built and shipped** multiple end-to-end AI applications spanning Generative AI, Agentic AI, and full-stack web development.
- Active open-source contributor** on GitHub with a track record of collaborative, team-based software development.
